SPINAL CORD INJURY (SCI) PHYSICAL ACTIVITY COUNSELLING PROJECT

We are excited to offer a free, online SCI Physical Activity Counselling Training on the theory- and evidence-based Best Practices for SCI Physical Activity Counselling. This training opportunity is for Kinesiologists and other professionals providing physical activity guidance or counselling to individuals with a SCI. The training was co-developed in partnership with an international team of SCI researchers, people with SCI, counsellors, and health professionals.

About this Physical Activity Counselling Course:

- Uses theory and evidence-based best practices
- Free, online 2.5-hour self-guided training
- Includes videos, quizzes and additional resources
- Provides practical tips and example techniques to use the best practices in physical activity conversations with adults with SCI
- To register for the training, please click [here](#).

UPCOMING COURSE: CLINICAL KINESIOLOGY 11 JULY 2024

The course is designed to equip both students and experienced practitioners with the knowledge, skills, and tools needed to enhance their kinesiology practices. It covers a broad range of topics, including health data interpretation, pharmacology, exercise testing and prescription, documentation, privacy, and more. The course is structured to enable students to learn at their own pace, with lifetime access to learning material and two live virtual sessions that allow you to apply your knowledge in real-life case studies. Whether you are just starting as a kinesiology student or an experienced practitioner looking to boost your skills and knowledge, this course is perfect for you. You will learn from some of the most respected experts in the field and gain the confidence and expertise you need to take your kinesiology practice to the next level. Do not miss out on this incredible opportunity to learn from the best - enroll in the Clinical Kinesiology Fundamentals course today!
