

NEXELIS opens 30 new positions in Laval, QC

Should you consider yourself to be among the best scientists or analysts in town, here is your chance to participate in the daily life of the most successful advanced testing service provider in the immunology field. Involved in the development of more than 15 SARS-CoV-2 vaccines in partnership with multinational pharmaceutical companies, innovative biotechnology companies and prestigious NGOs such as Bill and Melinda Gates Foundation or CEPI, we also proudly serve the needs of our clients in fields such as Flu (universal and seasonal), meningitis, respiratory syncytial virus, chikungunya, malaria, or HPV and are growing an immune-oncology franchise.

Among positions opened:

- Principal Scientist, Virology
- Lead Scientist, Virology
- Lead Scientist, Bacteriology
- Lead Scientist, Preclinical
- Manager, Infectious Disease Marketing Support
- Specialist, Lab Automation
- Associate, Preclinical Research
- Associate, Project Management
- Associate, QA
- Associate, Data Review and QC
- Analyst, Infectious Diseases R&D (x 4)
- Analyst, Infectious Diseases Clinical Testing (x 8)
- Technician, Sample Management
- Technician, Animal Health

About Nexelis

With unrivaled expertise in immunology, and operating sites in North America (East and West Coast) and Europe, Nexelis is a leading provider of assay development and advanced laboratory testing services in the infectious diseases, metabolic diseases, and oncology fields. Our versatile team of scientists, working with our advanced technology platforms, were instrumental in the development, qualification, validation, and large-scale sample testing of assays that supported the FDA filing of almost 100 new molecular entities, including blockbuster vaccines, anti-viral drugs, and immunotherapy, gene and cell therapy products. www.nexelis.com
