

# PROVISIONAL PROGRAM

Throughout the AMVQ colloquiums, you will be able to reach veterinarians, from the boardroom to their living room. In 2016, an average of 363 veterinarians participated in our colloquiums, which were offered in the boardroom and in Webcast! For your representatives, it is an occasion to meet, discuss and interact during breaks or dinner with about 164 veterinarians on hand!

# NATIONAL ANIMAL STERILIZATION WEEK IN QUEBEC

Aware of the need to show Quebecers that veterinarians are concerned about the number of abandoned animals, the Association des médecins vétérinaires du Québec en pratique des petits animaux (AMVQ) is pleased not only to have initiated a national animal sterilization day in Quebec but also to have drawn attention to the strong involvement of its members. In fact, 96% of the members support this day!

Every year, an average of 225 veterinary hospitals and the majority of veterinarians working in animal shelters participate in various ways in the national animal sterilization day.

Among the actions taken, let us mention the promotion of the Website [www.sterilisationanimalequebec.info](http://www.sterilisationanimalequebec.info) and the sterilization of the cats from the SPA/SPCA, the municipal animal services or organisms who capture stray cats.

Other activities are also organized during that special day: gifts offered to those who have their animal sterilized, prize draws, school visits, letters sent to municipal politicians, donations to organisms that help animals, etc. Many projects are also organized, such as promotions on the Web, Facebook and Twitter, open houses, news releases in local newspapers, etc.

**In 2016, the AMVQ has decided to change the concept. The one day event became the National Animal Sterilization WEEK in Quebec. We want to show animal owners that the issue is important enough to promote sterilization during one whole week rather than only one day per year.**

Also, every year, the AMVQ organizes a contest for the public and the veterinary community.

Thus, in 2016, it was a photo contest where participant owners provided a portrait with their pet and their veterinarian during a consultation.

Like Royal Canin, the CDMV, the City of Montréal and ANIMA-Québec

who all collaborated on this event, **we invite you to become partner in the National Animal Sterilization Week in Quebec.**

While helping deliver different activities planned for this event, you show your involvement in animal well-being to the veterinarian community and the general public.

Also, if you become partner with the National Animal Sterilization Week in Quebec, your logo will be added on the official poster of the event and your name will be included in the official press release. These two advertising media will be distributed to all the veterinarian hospitals and to every media covering the event.

Your partnership will also be mentioned in the press conference for the event and in the promotional videos that will be on line and presented to the profession at the convention in February. Your partnership will also be added on the Website of the National Animal Sterilization Week in Quebec.

**By partnering with this event, the AMVQ offers you the opportunity to get in touch with the public!**

In fact, every year, the AMVQ takes the census of the animal owners who have their animal sterilized during the event. As Royal Canin who gives a discount coupon to the first 400 people who have their animal sterilized, we welcome your ideas for prizes given to the community.

**SPONSORSHIP COST**  
**\$ 2,500**
