

**Bar Imex International Inc. and Agri-Mondo merge
to become Krōps Imports.**

It is with pride that we announce the merger of two industry leaders, Bar Imex International Inc. and Agri-Mondo Inc. The new entity will begin operating as of September 8th, 2018 under the name **Krōps Imports**.

The merger will generate great benefits to our customers, who will be able to rely on our sales strength and our ability to provide unparalleled customer service. The combination of expertise and complementary strengths will help Krōps Imports face today's challenges in the produce industry. The decision to merge is based on the conclusions of a consulting firm that evaluated the best way to accomplish and secure the ambitions of both companies.

The new entity will pursue an ambitious growth strategy through offering a wide range of commodities, vertical integration by acquiring agricultural productions abroad, and a focus on product innovation. Krōps Imports will also support our customers in their objectives of establishing direct relations with suppliers.

This is an important milestone in the history of both organisations, and we are convinced that our customers, suppliers, and employees will benefit from this merger.

We look forward to continuing to serve the produce industry and to a successful future together. Please do not hesitate to contact us should you need further information.
